Career Objective

I believe every application tells a story, and as a Software Developer, I am dedicated to making it a compelling one. With the dedication of a craftsman, I meticulously weave together technology and creativity, ensuring every detail is artfully designed to create a seamless and compelling user journey. My passion is to build these digital narratives, and I am eager to join a visionary team where I can not only contribute to impactful projects but also evolve into a mentor for the next generation of builders.

Skills

Technical Skills:

HTML5, CSS3, JavaScript, React.js, Node.js, Express.js, MongoDB, Firebase, JWT, Git, GitHub, React Router, React Hook Form, React Query, React Native, Tailwind CSS, Bootstrap, DaisyUI, Nodemon, NPM, Vite, Netlify, Vercel, AWS, Next.js, Chart.js, Framer Motion, Figma, Canva

Projects

1. Medicaamp - Medical Camp Management System

[Live Site](#) | [Client GitHub](#) | [Server GitHub](#)

A full-stack web app for managing medical camps, enabling organizers to create and oversee events while participants can register, explore details, and provide feedback. It includes role-based access, real-time features, and a powerful dashboard system for seamless healthcare event coordination.

Major Features:

- Authentication with JWT and secure role-based access (organizer, participant).
- Organizer dashboard for creating, updating, and managing medical camps.
- Participant dashboard for registering, tracking, and rating attended camps.
- Real-time camp search, feedback system, analytics with Recharts.
- Cloudinary image upload, responsive UI, and interactive animations.

2. WhereIsIt – Lost & Found Platform

[Live Site](#) | [Client GitHub](#) | [Server GitHub](#)

WhereIsIt is a full-stack lost and found web app where users can post and search for items with images and details. It features secure authentication, search filters, and a responsive, animated UI.

Major Features:

- Secure user authentication using JWT and Firebase.
- Users can post lost or found items with images and details.
- Search functionality with filtering by category and location.
- Fully responsive design with animations and intuitive UI.
